SMART THERMOSIPHON SWH

With Bural Smart Thermosiphon SWH, you can control electrical support of your smart thermosiphonic solar water heater in your home.

You monitor its work via Internet through your PC or smartphone.

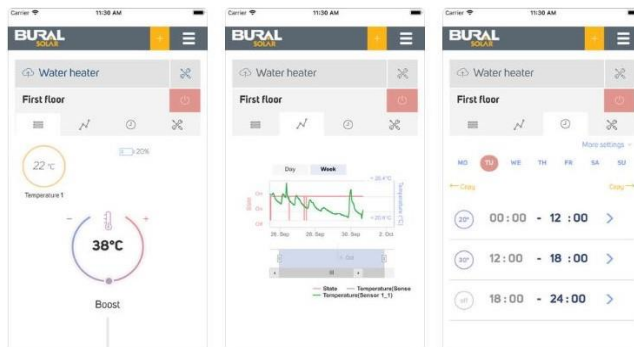

Bural Solar **Smart Thermosiphon Solar Water Heater** can be configured, set individual schedules and the temperature monitored in real time.

The product:

- Bural Solar **Smart Thermosiphon SWH** allows fast automatization.
- The technology set in Bural Solar **Smart Thermosiphon SWH** allows it to connect with any wireless Internet, without the need of any additional settings.
- Bural Solar **Smart Thermosiphon SWH** is a complex system with which you not only turn on and off the electrical support remotely, but manage and adjust its several functions.
- Bural Solar **Smart Thermosiphon SWH** allows the users to receive real time information and current status.

What you will receive:

- Opportunity to create whole schedules and to set customer logic in the creation of weekly or monthly schedule.
- Possibility to create set scenarios beforehand – 'Vacation', 'Work week', 'I'll be home late', etc.
- High level of security.
- Creation of an adaptable schedule based on a real time information.
- Complex adaptable control algorithms.
- Constant real time information about your solar hot water tank's water temperature.
